WE STRIVE FOR OUR

We've realised how sustainable development is important to us. Since the advent of the product we use natural resources. We understand that natural resources are exhaustive and should be used sparingly. Therefore, we have defined sustainable development as a strategic goal We've realised how sustainable development is important to us. Since

We live in a rapidly changing world, and we witness profound changes in society

But invariable were and still are the basic principles on which the activity of the company has been built - honesty in relations with customers and partners, an extensive range of products, consistently high quality of our cement, accessible prices, social responsibility, the desire for stability But invariable were and still are the basic principles on which the activity of the company has been built - honesty in relations with customers and partners, an extensive range of products, consistently high quality of our cement, accessible prices, social responsibility, the desire for stability

SUSTAINABLE DEVELOP

We've realised how sustainable development is important to us. Since the advent of the product we use natural resources. We understand that natural resources are exhaustive and should be used sparingly. Therefore, we have defined sustainable development as a strategic goal

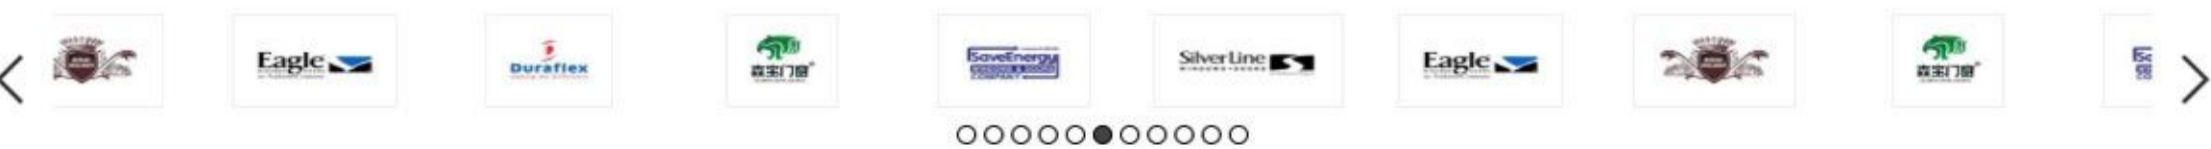

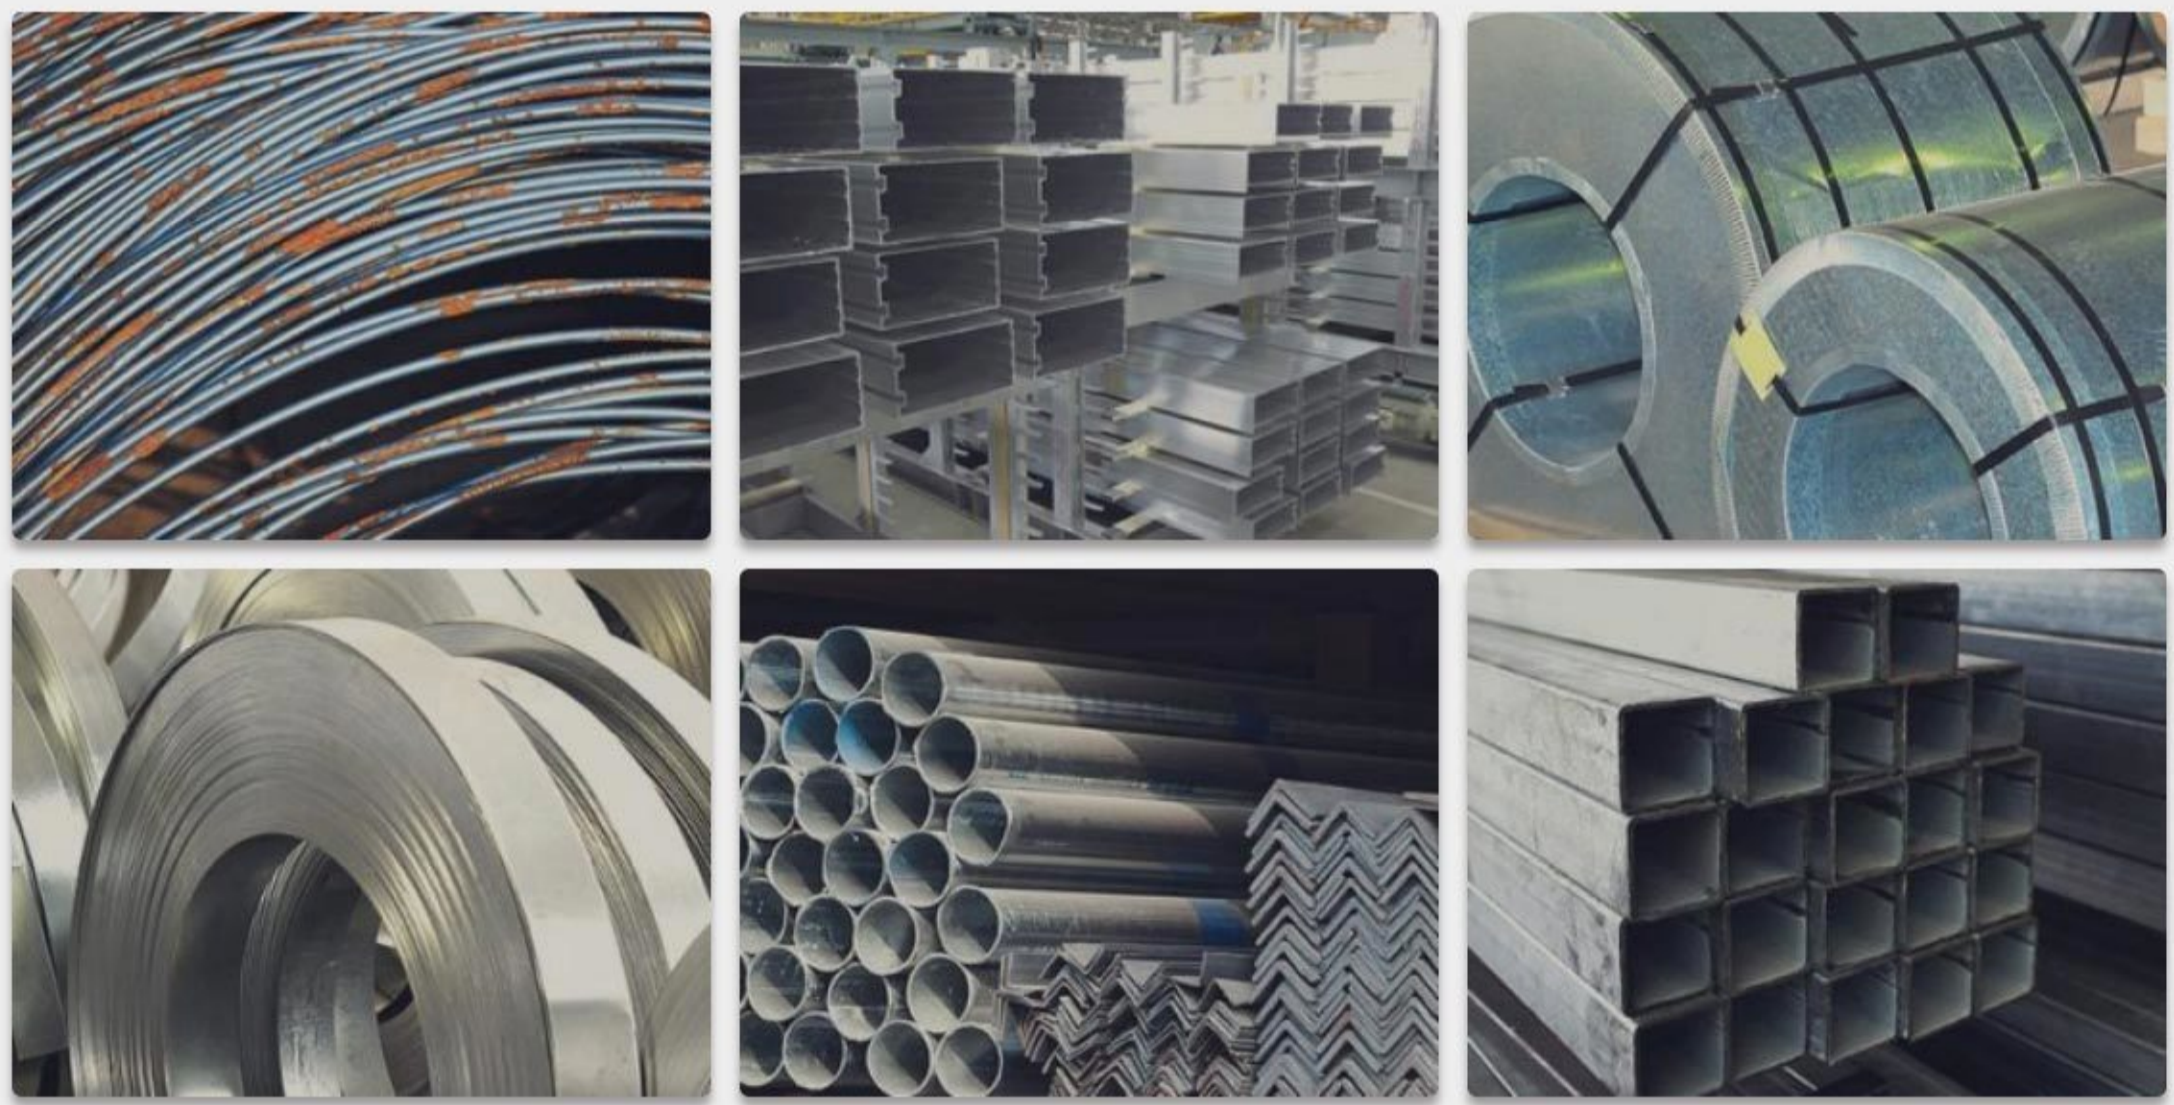

Best sellers

All business lines clearly improved their sales volumes year on year. Thanks to this growth in sales volumes and successful price increases in major markets, revenue improved moderately to €13,547 million (previous year: 12,128) despite substantial negative exchange rate effects of €417 million. All business lines clearly improved their sales volumes year on year. Thanks to this growth in sales volumes and successful price increases in major markets, revenue improved moderately to €13,547 million (previous year: 12,128) despite substantial negative exchange rate effects of €417 million. The satisfaction of our customers - that is the main task and mission of the
